

A LOOK BACK AT AFRICA STEMI LIVE! 2022

Welcome to AfricaSTEMI Live!

- AfricaSTEMI Live!, launched in 2016, is the continent's foremost international congress of professionals concerned about acute cardiac syndromes.
- The 5-day event connects practitioners in the medical and public health arena to a wide array of policymakers, investors, researchers, thought leaders, and specialists transcending national and international borders.

Last years edition: 2022

In-depth scientific discussions on:

- Acute cardiovascular care
- Echocardiography in ischemic heart disease
- Acute coronary intervention
- Updates in cardiovascular medicine
- a glance at ongoing research in Africa
- advocacy for enabling better care in acute coronary syndromes and well as providing a platform for digital collaborations and data sharing in the African continent.

Abstract Presentations

- Abstracts submitted to the Africa STEMI live committee underwent a peer-review process culminating in the best abstracts being published in a special issue of the Cardiovascular Journal of Africa.
- The best 20 abstracts were presented live during the congress and featured case studies, prospective and retrospective studies from diverse.
- Interventions for coronary artery disease, comorbidities, risk stratification, and community research were among the subjects covered. Each presenter summarized their case/research in a 7–10-minute talk, which was followed by a brief panel discussion and judge-led question & answer period.
- The award-winning abstracts were acknowledged, and they each received a prize.

Interactive Pre-Congress Workshops

Acute Coronary Interventional Suite

We had a range of conversations through didactic and interactive instances, including the status of ACS intervention in Africa, statistics from the MIRAMI registry showing that the most popular technique in Africa was a pharmaco-invasive one, and more.

The second session dealt with methods to complex coronary architecture that are frequently used in the management of ACS and how IVUS is used in spontaneous coronary artery dissection. the potential Cath lab problems are discussed.

Echocardiography Workshop

A course designed by the famous SUNEcho team and supported by personnel from Harvard Medical School, Duke University and the Mayo Clinic with involvement from the PASCAR imaging teams, this three day workshop also included a master session in stress echo by Derek Chin from Singapore.

The echo course focused on echo imaging in coronary artery disease, ischemic heart disease and its mimics.

Acute Cardiovascular Care Symposium

The most popular symposium of the program, this attracted medical officers, residents and fellows in training and physicians and provided a comprehensive instruction on the best ways to handle medical emergencies. It contextualized instruction and conversation for the upcoming generation of African doctors and researchers, collaborating with industry specialists.

Pre-Congress Workshops

The curriculum included two days of interactive sessions with live demonstrations and didactic presentations

Ten Major Partners Exhibitions

Our partners were able to showcase technology and products to the delegates in attendance for the four days of the congress

Opening Ceremony

The Africa STEMI Live! event was officially opened by the First Lady of Kenya, Her Excellency, Mrs. Margaret Kenyatta. She applauded the efforts being made by Heart Attack Concern Kenya and the Kenyan government to increase the public's awareness of heart attacks. She thanked the Africa STEMI organizers for the many partnerships that have been established since the initial Africa STEMI Live in 2016, spanning continents such as Africa, Europe, and Asia. These partnerships included those with cardiac societies like the Pan-African Society of Cardiology (PASCAR), the Kenya Cardiac Society, and Kenyan County.
